Preface

This manual applies to **suppliers** of all DOGA companies, hereinafter referred to as «**DOGA**».

DOGA's goal is to guarantee the absolute satisfaction of every one of our customers. For this reason, guaranteeing the quality of all our products is essential. A major portion of this task is based on the proper relationship between **DOGA** and its **supplier**s. Therefore, this document is meant to act as a binding document for all **suppliers**, both existing and future potential **suppliers**.

The conditions or agreements with the **supplier** are NOT overwritten by the section that affects this manual.

Related documentation available at www.doga.es/purchasing-files/

Sustainability (ESG)

Sustainability, with the three pillars (E=Environment, S = Social, G = Governance) is an ongoing process through which companies integrate social, governance, environmental, and supply chain considerations into their operations and corporate strategy.

Suppliers are encouraged to align with these policies and practices to help enhance the quality of life for employees and the communities potentially affected by the company's activities.

1. Code of Conduct

DOGA considers collaboration with the supply chain an integral part of its success and therefore strives to operate as an integrated team with suppliers. The selection of suppliers is based not only on the quality and competitiveness of their products and services, but also their adherence to social, ethical and environmental principles included in DOGA Code of Conduct.

Suppliers are also expected to be familiar with the business practices of their suppliers and subcontractors, and ensure they operate according to this Code of Conduct. DOGA may discontinue its relationship with suppliers who fail to comply with this Code of Conduct.

The **supplier** must be aware of the DOGA Code of Conduct and transmit it to its staff and its different collaborators. The Code is available at www.doga.es/purchasing-files/.

2. Personal data protection

Supplier's personal data protection rules are also available at www.doga.es/purchasing-files/.

The **supplier** must be aware of the rules and transmit it to its staff and its different collaborators.

3. Substances of concern

The **supplier is responsible** for complying with all applicable regulatory and legal requirements, including but not limited to:

- Regulations of the European Union: REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) y POP (Persistent organic pollutants), available in https://echa.europa.eu
- Restriction of the use of certain hazardous substances in electrical and electronic equipment RoHS, available in Restriction of Hazardous Substances.
- **Suppliers** linked to 3TG conflict minerals should report their compliance on a yearly basis, available in responsiblemineralsiniciative.org.
- California State Law (USA) Proposition 65, available in https://oehha.ca.gov/proposition-65.
- GADSL (Global Automotive Declarable Substance List) available in www.gadsl.org
- TSCA (section 6) Restrictions and TSCA (section 8)
- EU Waste Framework (SCIP)
- Canada prohibition certain toxic substances (PCTS)
- Singapore national Environment Agency (amitrole, nonylphenol ethoxylates, iprodione, Decholrane plus and UV328)
- Dechlorane PLUS (POPs) Japan prohibition after autum 2024
- Restriction of use of certain synthetic chemical Per- and polyfluoroalkyl substances (PFAS)
- Asbestos Declaration

Suppliers are expected to proactively work together with DOGA in phasing out substances of concern wherever possible to reduce our dependency on these materials and enable a circular society.

The **supplier** will notify the breach of the applicable regulatory and legal requirements concerning the products/services supplied immediately This must be done in writing (e-mail or letter) to the **DOGA** Purchasing Department.

In case of lack of communication from the supplier, **DOGA** Purchasing Department will assume that the supplier confirms its compliance with all applicable legal requirements for products/services supplied.

4. Material and Substance content reporting (MDS)

To ensure compliance regarding content of chemical substances, the supply partner **must** submit a Material Data Sheet (MDS) consisting of a declaration of all included materials and substances and their weight.

The MDS is a living document and shall always reflect the true content of the delivered parts or components.

5. Environment

The **supplier** commits to:

- Carry out activities that are respectful to the Environment
- Establish adequate policies, objectives, and procedures for this purpose.
- Define actions to certify the company under ISO 14001 scope.
- Be in possession of the Environmental License or Operations Permit.
- Set decarbonization targets
- Reduce the usage of natural resources in their production operations such as water, energy, gas
- Promote Circular Economy initiatives
- Propose the usage of recycle material
- Conformity of their products according EUDR

Quality

6. General conditions of quality

The **supplier** commits to:

6.1 Certification

Certify its Quality Management System and maintain it according to **IATF 16949**, or **ISO 22163** where applicable, which are the preferred and expected QMS standard.

If a supplier **does not have IATF 16949 or ISO 22163 certifications**, then **certification to ISO 9001** through a third-party accredited entity is required **as a minimum.**

Additionally, for suppliers providing products or services related to **railway applications**, compliance with **EN 15085 – Welding of Railway Vehicles and Components** is **mandatory**. The certification must be issued by a recognized and accredited body. Suppliers must ensure **ongoing compliance** with EN 15085 requirements, including documentation, qualified welders, and proper welding coordination personnel.

This requirement applies in addition to the general QMS requirements (e.g., IATF 16949 or ISO 9001), depending on the specific product and industry served.

Preferrable and upon request:

- Electronic products: ISO26262 desirable and ISO21434 upon request
- Special processes: CQIs upon request
- Testing and calibration laboratories: ISO/IEC17025

6.2 Documentation and Compliance

The supplier shall provide DOGA, upon request, with all necessary technical documentation demonstrating compliance with the applicable quality objectives and requirements.

The supplier confirms that has the necessary production capabilities and can manufacture the parts to the required quality standards as set out in the technical documentation provided by the Buyer

Buyer reserves the right to conduct a preliminary inspection or audit of Supplier's facilities and processes and equipment to confirm the feasibility of the production referred to this contract at reasonable times and with prior notice.

6.3 Product Quality and Warranty Responsibility

The supplier is responsible for ensuring the quality of the products supplied, both throughout their production process and during the warranty period established by DOGA for its customers.

Any **costs associated with poor quality** during the warranty period that are attributable to the supplier will be **charged back** to the supplier. This includes, but is not limited to, **costs invoiced to DOGA by the end customer**.

6.4 Epidemic Failures and Safety Incidents

In the event of a **warranty claim due to an epidemic failure** (also referred to as a **Service Campaign** or **Recall**) or an issue considered a **safety-related incident**, the supplier will bear the related costs. These cases will receive **special consideration** and be **analysed and negotiated individually**.

6.5 Product and Process Changes

Unless otherwise specified in writing by DOGA, all products supplied must strictly comply with the **materials, production methods, and control processes** approved during the homologation phase.

Any changes to **materials, production equipment, or control methods** must be **communicated in writing** to DOGA's Quality Department with **sufficient lead time** for evaluation and approval.

6.6 Traceability

The supplier must implement, maintain, and utilize a **traceability system** for all supplied products, ensuring identification throughout the supply chain.

6.7 DOGA Commitments and Rights

- **Provision of defective parts for analysis:**

  DOGA commits to provide the supplier with defective parts for the purpose of root cause analysis when necessary.

  If the failure is attributable to the supplier, all associated costs will be charged back to the supplier.
- **Right to freeze deliveries:**

DOGA reserves the right **to suspend or freeze deliveries** from the supplier if it fails to comply with the obligations outlined in this procedure.

This measure can apply to **current serial production parts** as well as **new projects.**

- **Right to implement additional quality controls:**

  If the supplier's corrective actions are not effective, DOGA may implement additional quality controls to protect its production. These actions may include:

  - **CSL-1 (Controlled Shipping Level 1)**

    An additional inspection process carried out and supervised by the supplier at a location designated by DOGA. DOGA may also perform the control. All related costs will be **charged to the supplier**.
  - **CSL-2 (Controlled Shipping Level 2)**

    A more stringent control level, executed and supervised by an **independent third-party company** at a location designated by DOGA. All associated costs will be **charged to the supplier**.

    Additionally, the supplier will be **excluded from consideration for future projects** until the situation is resolved.

7. Product qualification

7.1 Requirements

Samples must be submitted in the following cases:

- New parts.
- Product modifications.
- Process change (tools, manufacturing location, repair, etc.) including sub-**suppliers**.
- Correction of anomalies raised in prior samples.

7.1.1 Documentation

It is required to submit documentation in PPAP form according to DOGA requirements below for all parts. Example available at www.doga.es/purchasing-files/.

Unless **DOGA** specifies a PPAP level, use the level that best represents the component to be delivered.

- Catalog part (also known as **standard parts** or **off-the-shelf parts**) refer to **components that are commercially available and pre-designed**, typically listed in a supplier's catalogue or database, and **not custom-designed** specifically for a single customer or application.
- R**eposition tool** refers to a **replacement or duplicate of an existing production tool**—such as a mold, die, jig, or fixture—used to **maintain production capacity**, **ensure continuity**, or **serve as a backup** when the original tool is worn, damaged, or relocated.
- New part: This includes parts resulting from new designs, applications, first-time tools use or processes
- Others: This category includes all other parts that do **not fit into previous classifications** but are still part of DOGA's supply scope.

Application examples:	Catalog part	Others	Reposition tool	New supplier-new part-new tooling
Element	**Level 1**	**Level 2**	**Level 3**	**Level 4**
Coversheet	M	M	M	M
Sample part	UR	M	M	M
Technical specification	M	M	M	M
Feasibility study (including capacity)	UR	UR	UR	M
IMDS	M	M	NA	M
Flow chart	UR	M	NA	M
Control plan	UR	M	NA	M
PFMEA (only coversheet)	UR	UR	NA	M

MSA (Measurement equipment analysis)	UR	UR	NA	M
Packaging sheet	UR	M	NA	M
Verification aids (specific control tools)	UR	UR	UR	M

M= The supplier must issue and send this document to the customer and keep a copy thereof.

UR= The supplier must keep a copy of this document and surrender it to the customer upon request.
NA=Not Applicable

Notes:

- Dimensional report: A complete dimensional report and a numbered drawing must be attached, indicating in it **all the characteristics of the drawing**. Parts used for the dimensional report must be shipped correctly identified.
- Material report: Additionally, to material certificates, the **supplier** must report compliance with section 2 on substances and materials.
- Important characteristic list (ICL): To assure quality during series the supplier must demonstrate process stability and/or appropriate monitoring of critical characteristics. At least characteristics identified as follows in technical documentation must be included in the ICL:

  ⬭ CRITICAL DIM. ▲ CRITICAL CHARACTERISTIC ♦ SAFETY CHARACTERISTIC

  DOGA may add other characteristics considered important by DOGA in the ICL form, which must be filled in by supplier and presented with homologation documents. In case sub-suppliers processes have an influence on the defined critical characteristic, the same requirement should be deployed and applied on the sub-suppliers.

7.2 Results of qualification

The Quality Department will inform the Purchasing department and the **supplier** of the results.
Possible results include the following:

- H: Qualification approved. The part is released to production.
- R: Qualification rejected. The part is not released for production. Unless otherwise indicated, the purchasing department must request new samples.
- HC: Conditional qualification. The part presents deviations that must be corrected within a defined timeframe and derogation document should be completed
  - HCS: Short Term Conditional Qualification. The part is not released, and the **supplier** must deliver new samples, correcting the deviations indicated in the qualification report.

    The usage of the samples already provided must be agreed with DOGA.
  - HCL: Conditional Long-Term Qualification. The part is released during the period notified to the **supplier**.

Logistics

8. General conditions of Logistics

8.1 Delivery and reception

Deliveries and services must take place within the deadlines or dates stated in the order.

The logistics conditions in terms of frequency, delivery date, quantity and packaging must always be agreed/approved with the SCH department, without representing any variation in the pricing conditions agreed with Purchasing.

Goods will be considered to have been received according to their date of receipt and delivery of the documentation in our reception warehouses. The latter will justify admission with an entry stamp (approved, save subject to examination) in the delivery note.

Delivery of the goods will be exempt from any type of charges other than those expressly stated in the order.

The packaging will be that which was approved during the qualification process in each SKU

All goods will be delivered in compliance with the packaging guidelines and requirements approved in the approval phase, as defined in the requirements included in this document. It is possible that **DOGA** may approve the use of alternative packaging to guarantee the supply.

Any **supplier** of chemical products must immediately send us any updates that may come into effect in the safety data sheet for any product supplied to the **DOGA** group.

Any anomally that is observed in the delivery, defects in the documentation, labeling, packaging, mismatching quantity or reference, quality, or deterioration of the goods, will be the responsibility of the **supplier**, according to the following procedure:

- The stamped carrier delivery note to will indicate "Accepted subject to examination" and the date of receipt.
- The goods must fulfill the required quantity and approved quality and logistics requirements. Just as quality control is carried out by sampling or applicable controls, logistics control is systematically carried out. Any defect or anomaly found will be applicable to all or part of the batch, and depending on the importance of the anomaly, charges will be applied for the recovery, or the goods will be returned, or the **supplier** will be notified so that it may perform the required re-work at our facilities. Any re-packaging or re-labeling due to discrepancies or damages or missing compliant labelling with the approved goods or goods received in poor condition will entail charges to the **Supplier**.
- Hidden defects. Damages of any kind caused by hidden defects of the goods that have not been detected in our controls at entry and quality issues that cause defects in the assembly, finished product or in the articles manufactured with it by third-party **buyer**s, will be charged to the **supplier**.

Excess order quantities will be immediately notified to the **supplier** and may provoke:

- Rejection of exceeded quantities.
- Admission of exceeded quantities, as "on account" corresponding to pending delivery schedules, if any.
- Admission without any other condition.

Costs related to delayed, defective or out-of-time material, such as stoppages and/or overtime in production, quality reworks, warehouse incidences or urgent shipments will be charged to the **supplier**.

The delivery conditions agreed in the contractual offer (RFQ) must be accomplished.

8.2 Packaging

The **supplier** should send the packaging proposal to DOGA contact person, template documentation is included on the homologation documents, available at www.doga.es/purchasing-files/.

If the agreed packaging is not used, **DOGA** reserves the right to charge the **supplier** any possible packaging handling and replacement costs.

In certain justified cases, the modifications must be previously agreed with the Logistics and quality Department of **DOGA**.

8.2.1 Packaging characteristics

When choosing the type of packaging, the following requirements must be considered:

- Supply of parts, without suffering any damage , up to the place of consumption.
- Minimum variation in container types.
- Optimal use of containers (filled by: 90% minimum).
- packages must be stackable
- Compliance with the expected standard dimensions.
- Easy manipulation and removal of parts.
- Recyclable external and internal packaging.
- Avoid all kind of filler chips.
- Compliance of environmental regulations (NIMF-15, etc)
- Prioritize the usage of returnable packaging
- Promote the usage of recycled materials in the packaging according to EU Regulation

8.2.2 Packaging labeling

Any package must be labelled using Odette Transport Label v1.4 (barcode format COD 128) format as per the example below. It is applied as an adhesive in non-returnable packages or as a label for reusable containers. All containers must be identified by ODETTE labels placed in a visible and safe place.

In addition to the specified data, packaging labeling must comply with additional characteristics if they involve raw materials, products for certification or containers per unit of load (pallets).

8.2.3 Raw materials

All raw material packages must be also identified by the **supplier**'s own labels, which must not be adhesive and must be placed on pallets in a visible and safe place.

8.2.4 Container labelling per load unit (Pallet)

All the containers must be grouped by product and must be positioned so that the primary packaging labels remain visible inside the load unit.

Products which, due to quantity or volume, are received in a single load unit, in addition to the individual labels per container, must carry a label stating the total content load unit.

8.3 Transport documentation

8.3.1 Delivery notes

All products upon delivery must be accompanied by their corresponding Delivery Notes which must be duly completed. The following data should be indicated:

- Supplier information (number, name, address).
- Delivery note number.
- Date.
- Purchase order number. And line
- Product.
- Description.
- Quantity.
- Batch number (if applicable)
- Expiry date (if applicable)
- Number of packages

In addition to reflecting this data, they must meet certain additional conditions if they involve raw materials or products to be approved.

All the Raw Material Delivery Notes must be accompanied by their corresponding Quality Certificates.

All homologation orders must be delivered according to the criteria specified in chapter 5 of this document.

NOTE: If the goods are delivered without a delivery note, **DOGA** reserves the right to do not unload the material. If unloaded, the reception of the material will take place on the date when the missing physical delivery note is received.

8.3.1 Packing list

It must contain the data of delivery including any of international commerce (tariff item for customs, origin country, etc) specific compulsory information and must also include the information about the full list of packaging used in each delivery, considering

- Description of the packaging (primary, secondary…)
- Materials used (plastic, cardboard….)
- Weight
- Percentage of recycled content

8.4 Containers

All products must be delivered in standard containers that **suppliers** have previously requested from the Logistics Department (Container Management). They can also be delivered in neutral or customized cardboard boxes from the **supplier**. To ensure the quality of the product during the handling, the following requirements must be considered.

- Reduction of disposable and/or non-reusable containers
- Minimum variation of container type.
- Optimal use of the container, 90% minimum fill level.
- Must be stackable.
- Materials packed in bags, plastic bags or recovered cardboard boxes (food products, cleaning, beverages, etc.) are not allowed.
- All Bac type containers or containers must be covered (to protect the product) with plastic, cardboard or unprinted paper (never newspapers, magazines, etc.).
- If applicable, container cleaning and/or pickup at the **DOGA** facilities is under **supplier** responsibility.

8.4.1 Container weight, small size (boxes)

The gross weight of cardboard boxes and BACS ODETTE containers will, in no case, exceed 15 Kg (for DOGA S.A. is highly recommended only 6 Kg.)

8.4.2 Container weight, large size (containers)

The maximum allowed gross weight for metallic containers will be 800 Kg.

8.5 Load unit (pallets)

Pallets and load support must meet the dimensions indicated below, except in special cases as specified in the purchase order.

8.5.1 Standard measures

Wooden pallets: Measures (length x width): 1200x800mm. Maximum allowed height will be 950 mm (900 mm for DNN).

Products, which, due to quantity or volume cannot form a single full load unit, are grouped in it in an orderly manner for their identification and control

8.5.2 Cardboard measures

The dimensions of pallets or load carriers for the delivery of cardboard boxes should be which is considered most appropriate, guaranteeing goods quality for both transport and storage.

8.5.3 Conditions of delivery of raw materials (straps and formats)

Raw material deliveries must be made according to the conditions indicated on our purchase orders or scheduling agreements.

8.5.4 Pallet protection

If products delivered on pallets or load support should be protected with shrink-wrapped plastic, that must contain a min. of 50% of recycled material, guarantying their quality during transport and storage, except when the technical data sheet of the product indicates otherwise.

Purchasing

9. General Purchasing Conditions

9.1 Purpose and Scope

These General Terms and Conditions of Purchase (hereinafter, the 'Terms and Conditions') govern all transactions involving the purchase of goods, components, materials, finished products and services carried out by DOGA, S.A. and its subsidiaries (hereinafter, "DOGA") from its suppliers (hereinafter, the 'Supplier'). These Conditions apply automatically to all orders issued by DOGA, unless otherwise stipulated in writing in a framework agreement or specific contract. Any modification to these Conditions must be agreed in writing and signed by both parties.

Supplier agrees to supply the Products as per the specifications, timelines, and conditions set forth in this Conditions. It is the responsibility of the Buyer to provide all the technical information necessary for the manufacture of the parts.

Buyer may request changes to the scope of Products, which will be subject to mutual agreement.

9.2 Definitions

• Products: Any goods, components, subassemblies, tools, machines, software or services contracted by DOGA from the Supplier, as described in the corresponding order or contract.

• Quality Standards: Set of technical specifications, standards, tolerances, documentation and regulatory requirements demanded by DOGA, the end customer or legal regulations, detailed in the order, technical drawing, internal specifications defined in point 6 of this supplier manual.

• Logistics: Requirements for packaging, labelling, transport, delivery times, Incoterms, documentation and procedures related to the receipt and dispatch of products, as defined in point 8 of this supplier manual.

• ESG compliance: The Supplier's obligation to comply with responsible environmental, social and governance practices, including human rights, labor, environmental, anti-corruption and transparency standards, as set out in the Code of Conduct, the Responsible Purchasing Policy and specified in points 2 to 5 of this supplier manual.

9.3 Orders, Schedules and Confirmation

All orders, including open supply orders with delivery schedules (Schedule Agreements), must be confirmed within a maximum of 48 hours of receipt. Otherwise, they will be deemed accepted in accordance with the conditions set out in the document. Orders include:

• Firm orders: binding and mandatory for the supplier.

• Forecasts: non-binding, but useful for capacity and procurement planning.

Any subcontracting of the supply, in whole or in part, must be previously authorised in writing by DOGA. The Supplier undertakes not to make any alteration, substitution or deviation without express consent.

Orders shall clearly indicate the logistical conditions and the applicable Incoterms 2020. Failure to comply with these may be grounds for rejection or penalty.

9.4 Delivery and Logistics Conditions

The Supplier undertakes to deliver the Products in accordance with the agreed quantities, dates, times and locations. Any possible deviation must be notified sufficiently in advance so that DOGA can take corrective measures.

In the event of unjustified non-compliance:

• DOGA may request urgent shipment of the material, at the Supplier's expense.

• Costs may be charged for line stoppages, customer penalties or other consequences arising from the breach.

• The logistics documentation must include the delivery note, order number, DOGA reference number, supplier number and requested logistics data (gross/net weight, type of packaging, etc.).

The Supplier must ensure compliance with current legislation on packaging, including the marking and indication of the weight of recycled and non-recycled plastic, in accordance with Law 7/2022 and Royal Decree 1055/2022.

9.5 Invoicing and Payment Terms

Prices and chargeable concepts other than those consigned in the order or, where appropriate, expressly modified and authorized afterwards in writing will not be admitted. The Supplier shall issue invoices exclusively for the items and prices established in the order. Any modification must be supported by written authorization from DOGA's purchasing department.

Different Purchase Order types in one single invoice are NOT allowed.

Invoices must be sent every two weeks (15 or 30 of each month) via email within a maximum period of 2 working days from the date of the invoice.

e-mail for DOGA S.A.: facturas.proveedores@doga.es

DOGA's other companies not stated above will inform accordingly.
The following information must be stated: **DOGA** material reference number, delivery note number, **supplier** code and Order Type + number (e.g. OrderType[space]OrderNumber).

To comply with law 7/2022 and RD1055/2022, the weight of disposable plastic packaging must also be indicated, differentiating between the weight of recycled plastic and non-recycled plastic.
Invoice payment of higher delivered quantities than those consigned in the order may be split according to the due date corresponding to the respective schedule.
The prices indicated in the order will be understood to be without VAT / taxes, which must be shown separately in the invoice, even in materials subject but exempt from VAT (according to art. 25 of the VAT law 37/1992) for export purposes and for imported materials exempt from VAT (art. 21 of the LIVA 37/1992).
DOGA reserves the right to:
• Withhold payments for non-compliance or non-conformities.
• Offset outstanding amounts with charges for returns or refunds (ZDEV).
• Request the rectification of incorrect invoices.
Payment terms are informed in the Purchase Order.
For DOGA S.A., regardless of the conditions mentioned, the payment days will be the 7th and 22nd of each month.
DOGA reserves the right to withhold payment for non-compliant goods.
DOGA will compensate ZDEV orders (Return Order) not managed by the **supplier**.

9.6 Quality Management and Non-Conformities

The Supplier must operate under a quality management system based on the ISO 9001 standard, with IATF 16949 certification being desirable if the product is intended for customers in the automotive sector. This system must be documented, implemented and continuously improved.
In the event of any defect or deviation detected:

- The supplier must notify this immediately before shipment.
- DOGA may reject entire batches and request corrective action.
- In the event of delivery of a non-compliant product, DOGA may:
  - Request urgent replacement at the supplier's expense.
  - Retain, return or dispose of the product at the supplier's expense.
  - Pass on the additional costs incurred (control, transport, production, customer complaints, etc.).

DOGA reserves the right to audit the supplier's quality system, upon prior notification and within a framework of collaboration.

9.7 Molds, Tools and Means of Production

Any means of production, tool, mold, die, utensil or control device owned by DOGA or its customer:

- Shall be clearly identified and registered.
- Shall be used exclusively for the manufacture of parts intended for DOGA.
- May not be transferred, copied or used by third parties without written authorization.
- Their maintenance and insurance shall be the responsibility of the supplier, who shall be liable for their condition and upkeep, and must be insured against damage.

In the event of destruction, damage or loss, the supplier shall be financially liable.

Use of the latter is limited to its facilities and exclusively to the manufacturing of parts of DOGA for **DOGA** and/or authorized **DOGA's suppliers**.

The transfer of our molds or dies and tools to other companies is totally prohibited unless authorized in writing by **DOGA**.

In case that the tooling is owned by DOGA's customer, everything described previously applies considering customer's tooling ID.

9.8 Legal, Ethical and ESG Compliance

- Supplier agrees that all Products or Services supplied to DOGA will comply with applicable laws and regulations governing the supply chain related to environmental matters, human rights and ethical business, as well as with DOGA's Code of Conduct.
- Suppliers agree not to disclose and protect confidential information to which it may have access as a result of the business relationship, particularly personal data.
- The supplier agrees to assume the obligation to act with transparency in the development of the business relationship and not to carry out any corruption or bribery practices in its activities, in any form whatsoever.
- Supplier agrees to assume an obligation to respect internationally recognized human rights, provide decent working conditions for its employees and ensure adequate occupational health and safety measures
- Suppliers agree to assume the obligation to respect and take care of the environment, always acting in accordance with the provisions of laws and regulations on environmental protection.
- Suppliers agree to participate and supply with the necessary information to evaluate their progress in ESG metrics.
- DOGA may audit the supplier's compliance with the above-mentioned sections. Such audits may include allowing an independent auditor access to supplier's facilities, and access to manufacturing, procurement and supply chain due diligence records, to the extent DOGA reasonably suspects the existence of any non-compliance practices.
- If the supplier violates or fails to perform its obligations under the items 1 to 7, DOGA shall have the right to request the supplier's

- prompt remediation of such violation. If the supplier fails to cure and/or cease such violation within a reasonable period, DOGA shall have a right to terminate its agreement with the supplier for material breach of contract and may claim compensation for any damage caused, including damage to its reputation.

9.9 Confidentiality

All technical, commercial, logistical, financial or any other information exchanged between DOGA, and the Supplier is considered confidential. The Supplier undertakes not to disclose or use such information for purposes other than those contemplated in the commercial relationship, and this obligation shall remain in force after the termination of the contract. The supplier undertakes to maintain confidentiality of all documentation and information received from DOGA, especially with all personal data included in any document shared by DOGA with the Supplier (even from a third party), and it is expressly prohibited to reproduce, share, copy or transfer any personal or any kind of personal data without DOGA consent in writing. The commitment implies that they cannot be revealed to third parties without the expressly authorization of DOGA.
Confidentiality will remain in effect, even after the end of the business relationship.

9.10 Export Controls

The supplier is committed to complying with international laws on piracy, fraud and arms trafficking. It also controls the final destination of its products, ensuring that they do not reach embargoed or internationally sanctioned countries. If you discover that your products have been used for illicit purposes or supplied to suspect entities, you should promptly notify your usual contact.

9.11 Termination

Either party may terminate the agreement if the other party seriously breaches its obligations and does not remedy the breach within 60 days of written notification.
In the event of termination:

- The Supplier shall cease all activities related to the supply.
- It shall return to DOGA the production resources, documentation and materials delivered.
- It shall delete or return all confidential information, as instructed.

9.12 Liability and Indemnification

The Supplier shall be liable for any direct or indirect damages, losses, costs or claims suffered by DOGA or its customers as a result of:

- Breaches of contract.
- Delivery of defective products.
- Negligent or malicious acts.
- Infringement of third-party rights.

The Supplier must maintain an appropriate civil liability insurance policy covering the risks arising from its deliveries, with a minimum limit that DOGA may establish based on the level of risk of the product.

9.13 Jurisdiction and Applicable Law

- Credits (materials / tooling…) supplied by **DOGA** cannot not be transferred to third parties unless expressly authorized by the **buyer**.
- If the **supplier** uses goods owned by the **buyer** to carry out the orders, he will be liable for the damage that could be caused to goods or third parties that result from negligence or fault by the **supplier**, its **supplier**s and workers of both.
- The **supplier** is obliged to hold the **buyer** free of liability and to compensate and indemnify it before any liability arising from damage.
- The **supplier** will take out an insurance policy against civil liability risks associated with business products with an insurance carrier to cover any responsibility that may arise in the use of the product. The minimum amount of the insurance will have to be defined based on the criticality of the component and the **supplier**'s invoicing amounts before **DOGA**.
- The **buyer** reserves the right to exercise the actions it deems appropriate in accordance with the right to terminate all or part of the orders, and even to demand compensation for damages caused by non-compliance with the delivery deadlines and dates indicated, defects of materials, associated documentation, packaging and any other that could be demanded from us due to anomalies or defects originating from the **supplier** or any services rendered to us.
- Additionally, if the supplier violates or fails to perform its obligations with the applicable law and all items included in DOGA's Code of Conduct, DOGA shall have the right to terminate its agreement with supplier and request compensation for these violations as well as for the reputational damage caused.
- For any litigation or controversy that may arise directly or indirectly in connection with the order, it is understood that the **supplier** expressly renounces the jurisdiction that may correspond to him and submits to the jurisdiction and competence of:
    - The Courts of Asti (Italy) for DOGA Italia S.r.l.
    - The local Courts of Nantong (China) for DOGA NANTONG Auto Parts Co, Ltd.
    - The Courts of Chicago (USA) for DOGA USA CORPORATION
    - The Courts of Curitiba (Brasil) for DOGA DO BRASIL, LTDA
    - The Courts of Bengaluru (India) for DOGA INDIA PRIVATE LIMITED
    - The Courts of Querétaro (México) for DOGA MEXICO COMPONENTES S.A. de C.V.
    - The Courts of Barcelona (Spain) for the rest.
    -

9.14 Language

These terms and conditions are available in Spanish and English. In the event of any contradiction between versions, the following shall prevail:

- For **suppliers** of DOGA, S.A.; FAINA TANGER SARL AU; and DOGA MEXICO COMPONENTES S.A. de C.V., this manual is available in Spanish and English, Spanish being the language of reference in case of discrepancy.
- For **suppliers** of DOGA NANTONG Auto Parts Co, Ltd., this manual is available in Chinese and English, English being the language of reference in case of discrepancy.
- For **suppliers** of DOGA USA CORPORATION, DOGA DO BRASIL, LTDA and DOGA Italia S.r.l., this manual is available in English, English being the language of reference in case of discrepancy.

Supplier Management

10. General Conditions for Suppliers

10.1 New Suppliers

DOGA is interested in enlarging the supplier portfolio with new potential suppliers used to work in complex scenarios, with high technical expertise (automotive sector preferred but not exclusive) and used to work with medium and small production series.

Any Potential supplier should answer the 10 questions described in the Onboarding Process.

If the score is above 50, then, any interested supplier must submit to the buyer responsible the following info:

- Quality Certifications (ISO 9001, -minimum required-), IATF 16949, ISO 14001, etc.
- Global **MMOG/LE** or equivalent assessment **(**basic MMOG/LE assessment desired)
- Get a minimum score of 20 points in the ESG Questionnaire

In addition, for new suppliers, it is compulsory to fulfill with sustainable DOGA policies, otherwise, DOGA shall have a right not to include the supplier in our approved panel and start any relationship with them.
After reviewing the information in a maximum of 30d, DOGA will communicate the acceptance or decline of the supplier candidature. All accepted suppliers must fulfil the documentation requirements to introduce the supplier into SAP.
Suppliers below 40 in the Onboarding Process won't be considered.

10.2 Current Suppliers

All **DOGA suppliers** should submit an MMOG/LE or equivalent assessment in a reasonable period.

Get a minimum score of 20 points in the ESG Questionnaire, If this score is not achieved, go to 10.4.3 of this manual.

10.3 Orders

If confirmation is not received within 48 hours of sending the order/schedule, the conditions set out therein will be understood as officially confirmed for all purposes.

Supplier programs report firm (binding) orders and forecasts (non-binding). Likewise, it allow to manufacture and supply raw material for the previous dates indicated in the corresponding fields of the order.

Products requested by the **buyer** cannot be subcontracted unless a specific signed agreement is available. If this were the case, this should not be a reason for modifying the existing conditions.

Any variation in this respect must be approved by the SCH department.

Close Purchase Orders show delivery date at **DOGA**. Schedule agreements show material availability dates according to Incoterm 2020.

If **the supplier** is responsible of the transport, then delivery date at **DOGA**, if **DOGA** is responsible of the transport then collection date at **supplier** site.

There are several Purchase Order types:

Type	Description
ZCL	Customer goods order
ZOI	Investment order
ZPR	Repair order
ZH	Homologation order (NO outsourcing)
ZZE	Outsourcing homologation order
ZDEV	Return order
ZTF	Third party order
ZOC	Closed order
ZE	Delivery plan
ZSE	Outsourcing order
ZSP	Outsourcing order for external phase
ZUP	Out of time order
ZPRO	Prototype order
ZOS	Service order
ZOSF	Billing plan

DOGA companies not integrated into SAP ERP System yet have their own purchasing orders codes and are informed accordingly.

10.4 Qualification of product suppliers

The evaluation criteria of external **suppliers** are subject to scores given by the Quality, Logistics and Purchasing departments. The maximum score is 100 points and depending on the final value, the related

actions are established. The objectives and actions for each category are agreed annually by the four departments and communicates by each DOGA's facility.

Each department has the following relative weight in the global evaluation:

- Quality: 25%.
- Logistics: 25%.
- Purchasing: 50% being (50% for Procurement + 50% for Sustainability).

Service **suppliers** will be evaluated by a single weighting of 100%.

Supplier evaluation will be carried out as established in the " **Supplier** Evaluation QM Manual", which reflects the functionality of the SAP system.

10.4.1 Quality assessment

The Quality Department carries out its evaluation according to the following categories and relative weights:

Automatic criteria:

- Rejections (% Qty claimed): 30%
- Incidents (% number of incident reports): 70%

The **rejection** and **incidents** score will be automatically established according to the SAP system. The criteria keep the max score if they are not rated.

10.4.2 Logistics assessment

The Logistics Department conducts its assessment according to the following categories and relative weights:

Automatic criteria:

- Delivery date: 65%
- Delivered quantity: 25%

Manual criteria:

- Customer (DOGA) stop: 10%

The **delivery date and quantity delivered** score will be automatically set according to the SAP system to assess the level of fulfillment of the delivery plan, as reflected in the " Supplier Assessment QM Manual".

A logistics penalty is a manual criterion whereby a score of 1 will be detracted from all those **suppliers** that have generated at least one (1) special shipment, or one (1) DOGA stoppage.

10.4.3 Purchasing assessment

The Purchasing Department evaluates the **supplier** considering the concepts detailed below

- Collaboration and price levels: 15%
  - If supplier is above the range of 80% of the familiy prices: 0
  - If supplier is below the range of 20% of the familiy prices: 100
  - Rest: 50
- Supplier certification: Quality Management System: 15%

- Do not have / Do not show evidence: 0
- Granted ISO 9001: 2015 50
- Granted ISO 9001 + ISO 14001 75
- Granted IATF 16949 + ISO 22163 or similar 100

- Agility and proposal accuracy: 10%
  - Answer on Time 100
  - Answer after 3rd requirement or above 0

- Assumption of responsibilities and cost overruns generated: 10%
  - Supplier causes any Special Transportation 0
  - Rest 100
- Sustainability: 50%

  Scoring in the sustainability chapter is obtained from the Sustainability Questionnaire.

  DOGA - Sustainability Questionnaire

  Rating of suppliers is according to the scoring:
  - Excellent Supplier: Scoring A >= 40 100
  - Good Supplier: Scoring B < 40 and >=30 75
  - Medium Supplier: Scoring C <30 and >=20 50
  - To Improve Supplier: Scoring D <20 0

For Suppliers qualified as To Improve, an Action Plan for recovery the situation must be sent to the buyer. This information is compulsory to continue as a DOGA supplier. Otherwise, DOGA shall have a right to terminate its agreement with the supplier and cease the relationship with them.

10.4.4 Qualification of service suppliers

Service **suppliers** will be evaluated by means of a manual weighing, to be established by the department that is involved the most with the **supplier** to be evaluated. All the criteria mentioned in the quality assessment, logistics and purchases will be considered, whenever they apply.

10.4.5 Global assessment

Qualification calculations are done quarterly.

The global assessment for suppliers of products is obtained according to the following formula.

Global weighting[1] = 0.25 * Quality + 0.25 * Logistics + 0.5 * Purchasing (50%P+50%S)
P: Procurement / S: Sustainability

[1] This calculation is entering in force by 3Q/2025. For 1Q&2Q/2025 calculations, those are according previous weights (45%Quality +45%Logistics +10%Purchasing -which includes sustainability-

The overall assessment for service suppliers will be that which is obtained directly according to their weight.
A level: >90% (preferred)
B level: >= 75-90% (eligible)
C level: <75% (on hold for new business)

Global score will be considered for new projects awarding
The minimum target for all suppliers is B level.

When the supplier submits a C-level rating, they are asked for an action plan according to DOGA's Open List format to improve the C-level rating in the next assessment.

10.4.6 Notifying qualification status

All the **suppliers** (especially those defined as main by consensus by Quality, Logistics and Purchasing) will receive a notification from the Purchasing Department informing them of their qualifications. In case of a global weighting score below the target, DOGA is entitled to requests the corresponding corrective actions within a maximum period of 15 days.

DOGA notifies the following month of the Supplier Manual Update the qualification to all suppliers. Only is case of changes (above or below the primary qualification mentioned) when calculated quarterly, DOGA will communicate the new qualification (A, B or C)

The **supplier's** answer will be evaluated by the Department responsible of the negative score. Whether supplier evaluation process (Chapter 8) into the Supplier Manual remains the same, the notified evaluation remains in force, despite the Supplier Manual may be updated related to other subjects.

10.5 Risk assessment

All those **suppliers** with a repeated global score below the target may be audited

External audits will be scheduled annually and can be re-scheduled when required.

Both, new and current suppliers should revert to DOGA the following info to ensure that regular DOGA production is not affected by any matter from supplier side:

- All instructions to be provided to suppliers by DOGA are updated, to enable the suppliers to act in the event of problems/delays in delivery or disruptions.
- Supplier must confirm that they meet expectations in matter of ESG, like business ethics, environment, working conditions, H&S, etc. for that purpose, supplier should send to DOGA the concerned documentation in force, (e.g. risk assessment, sustainability assessment, etc.)
- Suppliers should agree with DOGA the complete operational conditions of the relationship (e.g. supplier mapping, risk assessment, contingency planning, EDI, capacity, production flexibility obsolescence, packaging, labeling, etc.)
- Suppliers should have a process in place to assess the capability of supply chain partners utilizing a formal evaluation tool (e.g. mmog/le or equivalent).

In any case, all suppliers should have available the above documentation (at the latest level in force and send it to DOGA at first request.

11. Supplier development

11.1 Suppliers in Improvement (SIP)

DOGA chooses the list of potential **suppliers** to be developed (SIP, **Suppliers** in Improvement Process) on an annual basis, in agreement between the Purchasing, Logistics and Quality The **suppliers** included in the SIP list may include:

- Low performance **suppliers**, according to the result of the **supplier** evaluation of the previous years, if the supplier has a significant turnover.
- Critical part **suppliers**.
- **Suppliers** whose performance has worsened compared to previous year
- Other **suppliers** which require carrying out special developmental or follow-up actions as deemed by Purchasing, Quality or Logistics.

Throughout the year, **suppliers** can be included in the SIP list, which, for exceptional reasons, require special actions.

11.1.1 Action plan

All pertinent actions will be carried out for the development of each **selected supplier**, which may include, among others:

- Audit to detect areas of improvement and define an Action Plan in case non-conformities are found.
- PDCA

11.1.2 SIP supplier follow-up

In case an audit is performed, the **supplier** will respond to the NCs with an action plan within 30 calendar days after the audit.

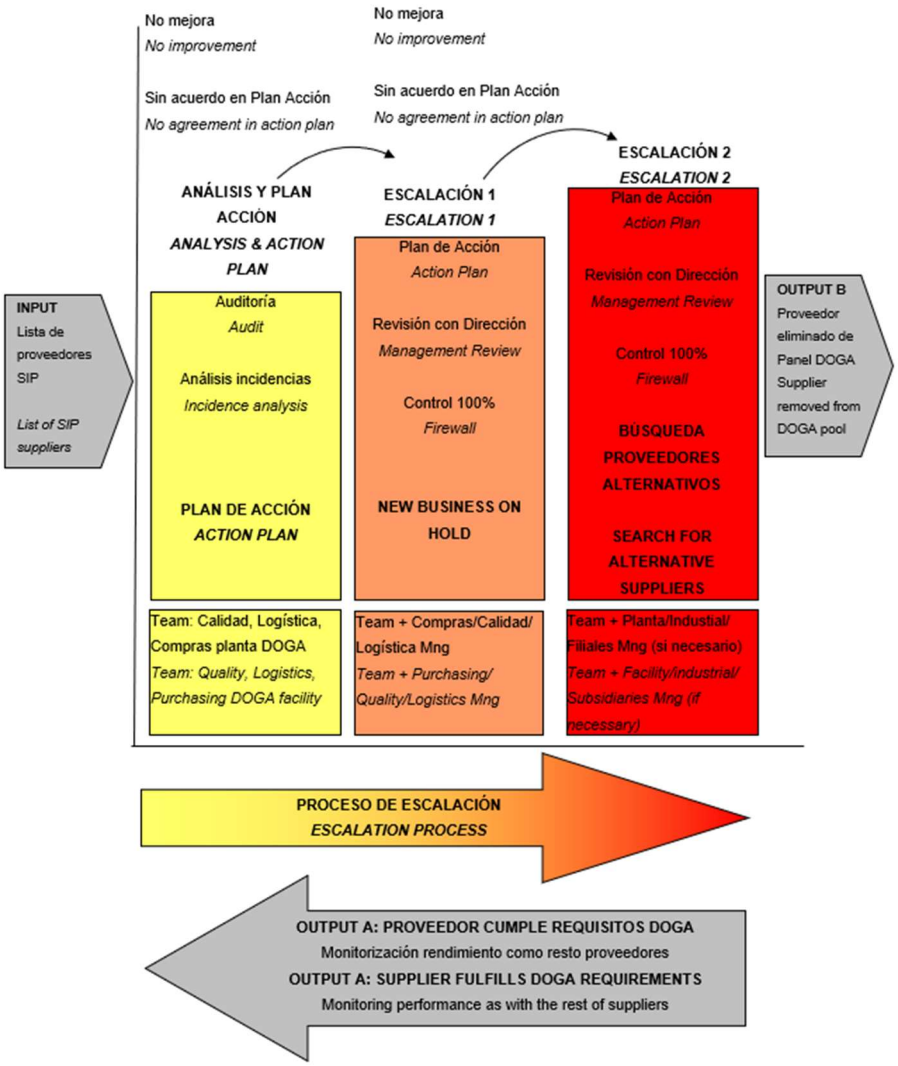
Purchasing will monitor the actions of the **supplier** within 60 calendar days after the audit.

Purchasing and Logistics/Quality close the **supplier**'s plan of actions the 180 days after the audit.

Doga will keep regular contact to follow up development plan with supplier according to actions defined.

11.1.3 Escalation process

SIP **suppliers** refusing to conduct an Action Plan or failing to fulfill it will follow the escalation process below:



Revisión *Revision*	Fecha *Date*	Descripción del Cambio *Changes description*	Iniciales *Initials*
00	12/Dec/2018	Initial release	AO
01	21/May/2019	DOGA INDIA PRIVATE LIMITED added into the scope	AO
